PATENTED ROSEBUSHES — BARE-ROOT

TWO-YEAR-OLD, FIELD-GROWN BUSHES

Since we are not growers, we are never forced to market a crop of inferior quality—and a rose crop can vary from year to year because of weather conditions. We can, and do, select the best. Our principal sources are in Ohio and on the West Coast. The quality, the packing will please you!

PLANT BANDS—PAPER POTS

BIRD Paper Pots

VITA-POTS: Grow and ship in the same pot—saves labor and leaves root ball undisturbed. Nutrient treatment, so successful in Vita-Bands, has now been applied to this sturdy resinous pot. Reduces watering.

RED POTS: For shipping only. Not recommended for growing. Lightweight and sturdily made to protect root ball from breakage—inner wax coating prevents drying out. A must to preserve the top quality of your plants in transit.

VITA-M POTS: A new pot of molded pulp construction, closely resembling a clay pot in appearance and dimensions. Extremely lightweight but completely durable and unbreakable and can be reused many times. Its chief merit is that you can grow and ship in it!

VITA-GREEN POTS: Nutrient-treated. Pots disintegrate after they're planted, eliminating transplant shock. Contains roots approximately 12 weeks. Can be used for growing and shipping.

BIRD VITA-BANDS AND FLATS

Vita-Band D

Contains root growth until grower chooses to let root through Band. Only quick, slight pressure is needed to crack Band. Do not remove Vita-Band D when transplanting. Band disintegrates in the soil permitting free growth of roots from time of transplant. Nutrient-treated with quickly available plant food.

Vita-Band 10

For short growing periods. Will usually contain root growth up to approximately 8 to 10 weeks. Nutrient-treated with quickly available plant food . . . your judgment determines need for additional feeding. Vita-Band 10 is identical to Vita-Band D except Vita-Band 10 is removed at time of transplant. Vita-Band D is not.

Vita-Band H

The new nutrient-treated successor that replaces Bird Vita-Band 40. Vita-Band H will control root growth of those plants which demand extra-long growing periods.

HARDY LILY BULBS

ONE OF THE LARGEST STOCKS OF LILY BULBS IN THE COUNTRY

Lily bulbs have long been one of our specialties, and we are pleased once again to offer our usual wide selection of old favorites, as well as some of the lesser-known but equally desirable varieties.

It is a common misconception that lilies can be planted successfully only in the Fall. While Fall planting is definitely beneficial in many respects, in the more northern states, Spring planting outdoors eliminates two great risks—Winter damage and the possibility of an outdoor crop's getting nipped by a late Spring frost. For, while all varieties are hardy, the foliage often is not! Only this past Spring we saw a fine stand of several hardy varieties ruined by a late frost that got the tender new growth. This would not have happened on a Spring planting.

Recent improvements in the handling and packing of Japanese lily bulbs have greatly increased their vitality and keeping powers, and the old stigma attached to these bulbs is no longer justified.

As a matter of fact, lily bulbs can be planted up until July, and a staggered planting of a case or two each month or every two weeks will provide the florist an almost continuous supply of blooms.

CRINODONNA CORSI

A hybrid between Crinum Moorei and Amaryllis Belladonna. Clear pink flowers in the fall.
\$2.00 each; \$18.00 per 10.

CRINUM

Crinum is the Greek name for lily, and these bulbs are so named because of their large, long trumpetlike flowers which resemble lilies. These Amaryllids are of great beauty and of great value as cut flowers. Huge spikes carry 10 to 12 large blooms, which may be cut separately and used to advantage in floral work. Also suitable for pot culture.

C. Asia'ticum. Pure white flowers, deliciously fragrant. Everblooming—flowering even in the winter in warm climates.
C. Cecil Houdyshel. Deep rose-pink. Everblooming from spring until fall. One of the best.
C. H. J. Elwes. Pink. Best suited for pots.

KAEMPFERIA

Thick, fleshy tubers of the Ginger family, valued for their foliage and flowers.

K. Atrovirens. A beautiful plant with large decorative bronze leaves. Soft lilac flowers appear all summer in endless succession.

K. Galanga. White, base spotted lilac.

K. Gilberti. Oblong leaves with broad white margins, grown for their decorative value in prior years. Flowers purple and white.

K. Involucrata. Soft green leaves, flowers lilac.

K. Rotunda. The very sweet-scented, fugitive flowers appear in the spring before the leaves, being white with a lilac lip. In summer the plants have large decorative leaves 2 feet long, with white and green variegations not unlike a Maranta. This Resurrection Lily can be bloomed from the dry tuber like a Colchicum. Most unusual.

ALL ABOVE: \$7.50 per 10; \$60.00 per 100.

Mixed Varieties: \$3.50 per 10; \$25.00 per 100.

LYCORIS SQUMIGERA*

(Amaryllis Hallii or Hardy Amaryllis).

Also known as the Magic Lily of Japan. Foliage disappears in the late spring, and the flower spikes, bearing beautiful umbels of lilac-lavender flowers, literally spring from the ground, as if by magic, in mid-August. Squamigera is extremely hardy; others only in the midsouth.

MILLA BIFLORA

Pure white, sweetly scented bulb from Mexico. Fine for cutting and an attractive addition to the outside garden border.

\$3.50 per 10; \$25.00 per 100.

MONTBRETIAS*

Large-Flowering Varieties

Of the many new seedlings introduced, we have selected what we feel are the best of the new large-flowering varieties. The culture is the same as for gladioli.

A. E. Amos. Deep yellow, scarlet flakes.

Aurora. Pure orange, large flowers.

Comet. Bronze-gold with rich maroon center. Long flowering period. One of the best.

His Majesty. Orange-yellow, tips and reverse being crimson-scarlet.

James Coey. Rich red, pale orange center.

Lady Oxford. Pale yellow, shaded peach-pink.

Rhinegold. Deep golden-yellow. Very fine.

Rainbow Mixture. All colors.

ABOVE: \$5.50 per 100; \$45.00 per 1000.

MONTBRETIAS—Standard Varieties

(The best of the older varieties)

Crocasmaeflora (Type). Orange-red.

Carmine Brilliant. Carmine-red.

Eldorado. Deep yellow; free-flowering.

Fire King. Deep red; late.

Frans Hals. Yellow, shaded bronze.

Rosea. Pinkish flowers.

Tigridie. Yellow, orange center.

Rainbow Mixture. All colors.

ABOVE: \$3.00 per 100; \$20.00 per 1000.

NERINES

Summer and late fall-flowering Amaryllids of great beauty and considerable value as cut flowers. Also good for pots. Hardy in many localities.

N. Bowdeni. Soft pink umbels.

N. Magnifica. Larger, deeper pink.

N. Rosea Crispa. Rose-red, petals much waved. Later to flower than others.

\$6.00 per 10; \$50.00 per 100.

ORNITHOGALUM*

O. Saundersiae. Glory of the Veldt. Resembles the Star-of-Bethlehem, but blooms in the late summer and fall. The flowers are white, with a blackish-green eye, and are borne in huge clusters, 4 feet tall, that last until frost.

\$5.00 per 10; \$40.00 per 100.

O. Thyrsoides. Cincherinchee. Flowers white, with a brown eye, blooming in August and September. 3 feet tall. Of great value as a cut flower, the flowers lasting three weeks or more. 18 to 30 florets on each stem. Each bulb produces several spikes.

\$6.00 per 100; \$50.00 per 1000.

OXALIS*

While *Oxalis* is commonly thought of as a pot plant to be started in the fall, there are several summer-flowering garden varieties, planted in the spring, and dug in the fall like gladioli. The blooms are dainty and extremely colorful when massed. They are practically everblooming.

O. Deppei. Coppery-pink flowers. "Lucky 4-Leaf Clover" foliage.

O. Deppei Alba. Pure white form.

O. Lasiantra. Rosy-crimson.

O. Vespertilionis. Lilac-rose.

\$2.50 per 100; \$15.00 per 1000.

PAMIANTHE PERUVIANA

Beautiful new bulbous plant for pot culture. Snow-white, sweet-scented flowers. Allied to *Hymenocallis*.

SAXIFRAGA

Perennial herbs, ideally suited for rockeries or borders. Flowers white, yellow, red, pink or purple. Mixed colors only.

\$4.00 per 10; \$30.00 per 100.

SANDERSONIA AURANTIACA

Beautiful climbing plant for the greenhouse, pot culture indoors or the summer garden. Urn-shaped, orange flowers. Treatment as for *Gloriosa*.

\$3.00 each.

SAUROMATUM GUTTATUM*

(*Arum Cornutum*)

Monarch of the East. An unusual novelty that should command more interest and probably will now that attractive colored pictures are available. It can be flowered from the dry corm indoors from January until June. The Calla-like spathe is olive-green on the back, yellowish-green inside, with black-purple spots and a red tongue. Can also be grown in the garden or planted out after flowering. It produces a small palmlike tree, and we have seen the bulbs winter over in Michigan with slight protection.

Large Corms: \$5.00 per 10; \$40.00 per 100.

TIGRIDIA—Mexican Shellflower*

These gay flowers will add interest to any sunny border. Treat like gladioli. We offer all named varieties or our **Special Rainbow Mixture**, in **Top Size** only.

\$5.00 per 100; \$40.00 per 1000.

VALLOTA PURPUREA MAJOR

Scarborough Lily. A popular pot plant with rich vermilion-red flowers, produced in profusion. In England they are grown commercially for cut flowers.

\$1.25 each; \$10.00 per 10.

ZEPHYRANTHES (Fairy Lily)

Charming small flowers for the border and grown in pots by some. Colors: **White, Yellow, Pink** or **Mixed**.

\$3.00 per 100; \$20.00 per 1000.

ZOYSIA GRASSES

There are three Zoysia grasses which we recommend:

MATRELLA—grown in this country for over 25 years. The standard Zoysia for the South and West. It has the darkest color, the finest blade of all three, makes a thick turf that eliminates weeds, yet needs very little mowing. Matrella is an excellent grass for sun, but will stand up to 80% shade. It can be grown anywhere south of Washington, D. C., and St. Louis, Mo., and the western parts of California, Oregon and Washington. May be planted year around.

MEYER Z-52—developed by the U. S. Department of Agriculture. It is winter-hardy throughout the United States and even Southern Canada, but frost will turn it a golden-tan color, which many find as attractive as its summer green. It is the fastest-growing Zoysia, has a wider blade than the other two, but will not take as much shade. It is recommended for those states north of Washington, D. C., and St. Louis, Mo., including the Far West. Plant March to October.

EMERALD—the newest and best of them all. Its name derives from the bright emerald-green color. It grows rapidly, but since the stems are very short, it does not grow tall and permits very close mowing, making a beautiful lawn with relatively little care. Since it was only released in 1955, full tests of its hardiness have not been completed, but it has been found to thrive as far north as Ohio. Plant March to October.

There are three methods of planting:

TURF—most economical. Simply tear sprigs off and plant 10 inches apart. One square yard will cover 300 square feet of new lawn—can be stretched even farther in weed-free soil.

POT-GROWN—the fastest and finest method of planting. The root system is complete and undamaged, and since there is no transplanting "shock," the plants take hold faster, are more certain to grow and spread faster. Plant in 12-inch centers. Ideal for use in established lawns.

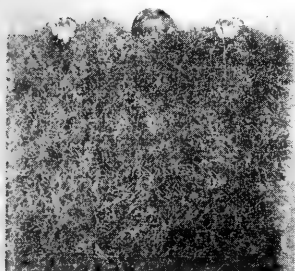

PLUGS—small sections cut, or "plugged" out of the turf. Can be planted directly into the lawn, or potted, and grown into a larger clump.

Regardless of the type of Zoysia chosen for your area, you are assured of having one of the finest lawns possible, as all Zoysias have the following characteristics:

TOUGH — PERMANENT — DROUGHT-RESISTANT — RESILIENT — WEED-FREE — EASY TO GROW — SPREADS RAPIDLY BUT DOES NOT GROW TALL — REQUIRES VERY LITTLE WATERING, MOWING OR EDGING.

Type	Turf per sq. yd.	Pot-grown per 100	Plugs per 100
Matrella	\$3.00	\$10.00	\$ 7.00
Meyer Z-52	3.50	12.00	8.00

RARE AND UNUSUAL FLOWERING PLANTS

STRELITZIA REGINAE

(Bird-of-Paradise)

AMERICA'S MOST EXOTIC FLOWER

Strelitzia Reginae has long been a stand-by of florists who have utilized the unusual flowers for the creation of strikingly different floral arrangements. More recently it was brought to the attention of gardeners when the city of Los Angeles voted it the city flower. Naturally it thrives outdoors in California and in our more temperate states, but in the northern states it is primarily a pot subject.

The flowers are a gorgeous arrangement of hues of red, yellow, blue and orange, borne on strong stems and extremely long lasting when cut. The plants themselves are extremely attractive, producing leaves of light green texture in the early stages.

Handy Colored Lithographed Tags are available on the wrapped plants, showing on one side the flower in full color; on the reverse are given the planting instructions. The plants are carefully wrapped in moist sphagnum moss in attractive silver foil and can be held for a month or more.

CLIVIA MINIATA

Clivias make excellent house plants (although we know one producer who grows and sells the cut flowers). They have broad dark green straplike leaves that are evergreen the year round and most attractive. They bloom in the late spring or early summer. Thick flower spikes produce large umbels of orange-red blooms. Clivias are actually members of the Amaryllis tribe, but have the advantage over Amaryllis of being easier to flower and having evergreen foliage.

Small Plants: \$7.50 per 10; \$65.00 per 100.
Large Plants: \$20.00 per 10; \$185.00 per 100.

ANTHURIUM ANDRAEANUM

An unusual plant, producing flowers of great and lasting beauty. Sometimes called Jack-in-the-pulpit, actually the name Anthurium is Greek for "Tail Flower," so-called because of the long spadix which protrudes from the shiny parchment-like flowers, which come in brilliant shades of red and pink. The incredulous amateur, upon seeing the flower, is invariably compelled to touch it to convince himself it is actually a real flower. We ship plants in bud. Pink or red.

\$15.00 per 5; \$25.00 per 10; \$50.00 per 25.

INSECTIVOROUS PLANTS

These native plants are of great interest and of considerable beauty. They are variously called PITCHER PLANT, VENUS'S-FLYTRAP, COBRA ORCHID, etc. They grow wild from northern Florida to Labrador, and it is strange they are not more common in commercial horticulture, as they make an interesting pot plant for the home—certainly an unusual conversation piece. They can also be planted in the garden. Space prohibits a detailed account of the chemical actions that attract flies and insects to these plants, but full details on growing accompany the plants.

Darlingtonia. Crimson and green, mottled white. May require some protection in really cold climates. A fine pot plant.

Sarracenia Purpurea. Flowers green when grown in shade; dark purple when grown in full sun. Very hardy.

ABOVE: \$1.25 each; \$10.00 per 10.

BROMELIAD—Air Plants

Also called Jewel Ginger, or Red Vase Plant, these Bromeliads are imported from Mexico and are strikingly different. While they will exist with occasional sprinkling of the leaves, they will do better if placed in a vase of water. Potted in soil, they will sometimes actually root. The lush foliage is attractively variegated; the flower a huge bright red cone.

\$10.00 per 10; \$90.00 per 100.

UNUSUAL HAWAIIAN PLANTS and BULBS

Interest in the exotic flowering and lush foliage plants of the Islands was whetted by stories of returning visitors, who repeatedly told us we could obtain them. We have finally arranged a reliable source of supply, but several weeks must be allowed for delivery. The bulbs and plants are flown in and arrive in excellent condition. The following are some of the more popular, more spectacular varieties. Many are suited for outdoor culture in warmer climates—as indoor or greenhouse subjects in the north. Can be planted outdoors in the north like Cannas, but should be started in flats or pots during the winter months. All prices are F.O.B. San Francisco or New York.

HAWAIIAN TI PLANTS (*Cordyline Terminalis*)

An interesting novelty, supplied in small logs, 1-inch or more in diameter and 3 inches in length. They can be grown in plain water, or in earth. May also be used in dish gardens when small, but will demand their own pots when mature, as they make striking pot plants.

Variigated Ti Plants run smaller, logs being 1/2 inch or more in diameter and 3 inches long. Leaves run in a wide range of colors, including shades of red, pink, purple, etc. The leaves have commercial value, being flown in for the florists' trade.

	Green Ti Logs	Variigated Ti Logs
Unrooted Logs	\$ 20.00 per 100 { 150.00 per 1000	\$ 20.00 per 100 150.00 per 1000
Sprouted Logs	{ \$ 5.00 per 10 35.00 per 100	\$ 7.50 per 10 60.00 per 100

HAWAIIAN TREE FERNS (*Cibotium Chamissoi*)

While Hawaiian Ti plants are relatively common in the United States, Hawaiian Tree Ferns seem to have been overlooked, which is to be regretted, as they are delicately artistic, are of easy culture and are splendid subjects for trays or dish gardens, as well as for arrangements in the Oriental or modern decor. Logs are 4 to 8 inches long, 2 1/2 to 3 1/2 inches in diameter, which size is most suited for home use, but larger sections (up to 10 feet long) can be supplied, and prices will be quoted on request.

\$1.00 ea., \$9.00 per 10, \$80.00 per 100.

GINGER LILIES

The following members of the Ginger family are of great commercial value, the cut blooms retailing around \$18.00 per dozen, but apart from this deserve to be cultivated for their attractive foliage, as well as their striking and unusual flowers. They are supplied in dry corms, or rootstocks, similar to a huge Canna root.

ALPINIA NUTANS. Shell Ginger. Striking plant, with long lanceolate leaves, fine for foliage masses, but grown principally for the orchid-like flowers, yellow and pink, sweet-scented, in long drooping spike-like racemes. Said to be everblooming in Southern California.

ALPINIA PURPURATA. Red Ginger. Similar to above, but flowers are a deep red.

HEDYCHUM CORONARIUM. White Ginger. Canna-like leaves, smooth above, hairy beneath; flowers very large, long tubed, pure white, but lip is sometimes blotched green.

HEDYCHUM FLAVUM. Yellow Ginger. Foliage similar to above; the large flowers are yellowish-orange.

ABOVE VARIETIES: \$8.00 per 10, \$70.00 per 100.

HEDYCHUM GARDNERIANUM. Kahili Ginger. Tall leaves; flowers light yellow, odd shaped, with prominent red filaments. Very showy

\$2.00 ea., \$18.00 per 10.

PHAEOMERIA SPECIOSA. Torch Ginger. Flowers are a waxy cerise-red, shaped like a pointed spear or torch. When fully open they somewhat resemble a double peony.

\$3.00 ea., \$25.00 per 10.

ALOCASIA MACRORHIZA (Giant Ape)

A foliage plant of great beauty. Leaves three feet long, margins often somewhat wavy, with a broad and conspicuous midrib. Very striking. Supplied in tip cuttings.

\$8.00 per 10, \$70.00 per 100.

CYCAS TERMINALIS (Fern Palm or Cycad Tree)

A palmlike tree with cylindrical trunk and a crown of glossy, fernlike, gracefully curved leaves, 5 to 8 feet in length. Supplied in good-size rooted side buds.

\$3.00 ea., \$25.00 per 10

CHRYSLIDOCARPUS LUTESCENS (Areca Palm)

The popular variety used by many florists, and commonly thought of when the word "palm" is mentioned. Supplied in 12 to 18-inch clumps—3 plants per clump.

\$5.00 per 10, \$40.00 per 100

HELICONIA (Lobster Claw)

Foliage plants allied to the Musa (Banana) family. The leaves are large and striking, often beautifully marked. The flowers are large and striking. Supplied in dormant corms, weighing 1/2 to 1 1/2 pounds each.

HELICONIA HUMILIS. Common "Lobster Claw." Attractive leaves, graced with equally attractive red flowers.

HELICONIA COLLINSIANA. The hanging form of "Lobster Claw." Attractive foliage, red flowers.

HELICONIA SPECIOSA. Bronze-leaved form.

ABOVE VARIETIES: \$1.50 ea., \$12.50 per 10

MUSA (Banana Family)

The largest of the tree-like herbs, grown for their striking foliage, for fruit, and for fiber. They are unsurpassed for gorgeous tropical effects. Supplied in large sucker plants, weighing 1 to 2 pounds each.

MUSA NANA. Chinese Dwarf Banana. Ultimate height 4 to 6 feet. Leaves formed in a dense rosette, blotched and spotted red when young. Bracts red-brown; calyx yellowish-white. Edible, deliciously fragrant fruit.

MUSA ROSACEA. Ultimate height 4 to 6 feet. Leaves purplish beneath; bracts pale blue or reddish-violet; calyx yellow. Not edible.

MUSA SAPIENTUM. Brazilian Banana. The common banana, the numerous species of which produce most of the commercial varieties. Ultimate height 20 to 30 feet. Bracts dull violet; flowers yellowish-white, about a dozen to a cluster.

ABOVE VARIETIES: \$2.00 ea., \$17.50 per 10.

PANDANUS ODORATISSIMUS (Hawaiian Hala)

Tropical plants remarkable for their stilt-like aerial roots and the perfect spiral arrangement of their long, sword-shaped leaves. Fine item for tubs or patio boxes. A scent much esteemed in some countries is said to be obtained from the male flowers. Supplied in young seedling plants.

\$4.50 per 10, \$35.00 per 100.

PLUMERIA RUBRA (Frangipangi)

Low tree or shrub, sometimes called the "West Indian Red Jasmine." Flowers are chiefly yellow, with bright rose tips. Supplied in tip cuttings, 12 inches in length.

\$7.00 per 10, \$60.00 per 100.

SPATHYPHYLLUM ("White Anthurium")

These Aroids are usually but erroneously called "White Anthuriums" because they so closely resemble an Anthurium. They are grown for their attractive flowers, and bright green leaves. Easy to grow, they like a lot of moisture, and will survive with very little light.

SPATHYPHYLLUM CANNAEFOLIUM. Large-growing species, with broad, dark green leaves and fragrant velvety white flowers.

SPATHYPHYLLUM CLEVELANDI. Glossy straplike leaves, white flowers—this species stands dark conditions very well.

ABOVE VARIETIES: \$10.00 per 10, \$75.00 per 100.

HAWAIIAN ORCHID PLANTS

PHAIUS GRANDIFOLIUS. One of the oldest orchids in cultivation. Sepals and petals reddish-brown, but white on the outside; labellum white at the apex, throat and disk yellow, sides crimson.

BLOOMING-SIZE CORMS: \$1.00 ea., \$9.00 per 10.

SPATHOGLOTTIS. Terrestrial Orchid producing numerous lavender-orchid flowers. Likes shade and much moisture when in growth.

BLOOMING-SIZE CORMS: \$6.00 per 10, \$50.00 per 100.

MICHIGAN SAND-GROWN GLADIOLI AND DAHLIAS

Michigan has long been regarded as a state producing top-quality, sand-grown Gladioli and Dahlias, and we are pleased to offer below the very best of the crop. All bulbs undergo a thorough field and storage inspection and are guaranteed to be true to name, up to size and free from disease or insect pest.

PRECISION PACKED PLANTS

Scientifically wrapped by machine under the patented "VIGOR-SEALED" process.

Gone are the days of random hand wrapping!

No more loose, sloppy, unattractive packages!

This ingenious machine does a professional job of packaging and assures you plants that will reach your customer as fresh as they left the nursery.

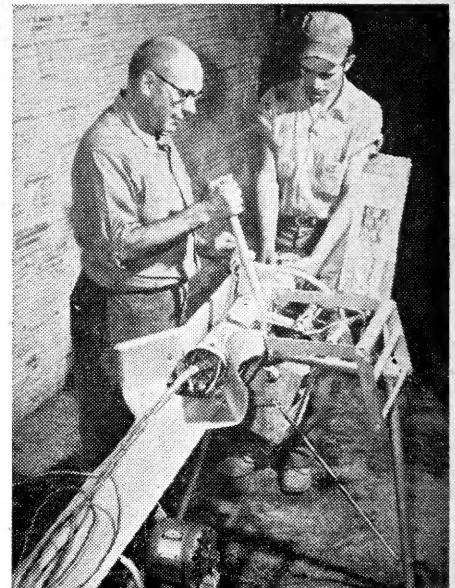

"Vigor-Sealed" packaging prevents root damage; it seals a controlled amount of moisture in a special peat mixture in a polyethylene-lined bag; it makes a solid, uniform package that is easy to display. The brilliantly colored bags are durable and eye-catching.

By giving your customers "Vigor-Sealed" plants you not only give them a better plant—you increase your own profits and cut down on your losses!

All stock (except roses) is packed 7 to a bundle.

Minimum order 7 of a variety and size.
